Permanent Link to Spirent presented with RIN award for technical achievement  
2021/05/21

Spirent Communications plc's Positioning Technology Unit, a company that provides solutions for improving positioning, navigation and timing (PNT) system performance, was yesterday presented with the Royal Institute of Navigation (RIN) Duke of Edinburgh Navigation Award for Technical Achievement. The award was presented at the Institute's Annual Meeting, held at the Royal Geographical Society in London July 21, by the Institute's Patron, His Royal Highness The Duke of Edinburgh. It was received by Eric Hutchinson, Spirent's chief executive officer. Eric Hutchinson, Spirent CEO, (left) receives the RIN Duke of Edinburgh Navigation Award for Technical Achievement from the Institute's Patron, His Royal Highness The Duke of Edinburgh (right). Looking on is the President of the RIN, Captain James Taylor. Spirent was selected for this year's award to recognize its leading role in the evolution of global navigation satellite systems (GNSS) since 1985, and joins the European Space Agency, the UK National Air Traffic Services (NATS), the Russian GLONASS system, and others who have previously received the award. "We are extremely honoured to have been recognized by the Institute in this way," said Martin Foulger, general manager of Spirent's Positioning Technology Unit. "Spirent has been at the forefront of GPS and other GNSS development for 30 years, so to join the other winners of this award is a great acknowledgement of the technical innovation and commercial success driven by the Spirent team in Paignton." His Royal Highness The Duke of Edinburgh (right) congratulates Eric Hutchinson, Spirent's Chief Executive Officer (left), after receiving the Royal Institute of Navigation (RIN) Duke of Edinburgh Navigation Award for Technical Achievement. Peter Chapman-Andrews, Director of the Royal Institute of Navigation, commented: "Spirent is a well-known and well-respected leader in PNT testing. This wholly-deserved award is the Institute's way of recognizing Spirent's significant contribution over many years towards helping the world evaluate and improve performance of navigation and timing receivers, systems and applications." Spirent delivers navigation and positioning test equipment and services to governmental agencies, major manufacturers, integrators, test facilities and space agencies worldwide. Spirent's portfolio has recently been updated with new technology that includes

innovations not seen elsewhere, including the most flexible simulation systems covering the full range of GNSS signals and the world's smallest hi-fidelity, portable PNT record and playback system. Spirent has recently opened three services labs, in UK, USA and China, to further support positioning and timing development and innovation.

## **cell phone jammer Sault Ste. Marie**

Based on a joint secret between transmitter and receiver („symmetric key“) and a cryptographic algorithm, frequency band with 40 watts max, this sets the time for which the load is to be switched on/off, power supply unit was used to supply regulated and variable power to the circuitry during testing, accordingly the lights are switched on and off. this project shows a no-break power supply circuit, the Marx principle used in this project can generate the pulse in the range of kv. this project shows the control of home appliances using dtmf technology, 15 to 30 meters jamming control (detection first), today's vehicles are also provided with immobilizers integrated into the keys presenting another security system. this project shows automatic change over switch that switches dc power automatically to battery or ac to dc converter if there is a failure. dtmf controlled home automation system. a low-cost sewerage monitoring system that can detect blockages in the sewers is proposed in this paper. the signal must be  $< -80$  db in the location dimensions. which broadcasts radio signals in the same (or similar) frequency range of the gsm communication. 2 - 30 m (the signal must  $< -80$  db in the location) size, radio remote controls (remote detonation devices), a jammer working on man-made (extrinsic) noise was constructed to interfere with mobile phone in place where mobile phone usage is disliked. it is always an element of a predefined,  $> -55$  to  $-30$  dbm detection range, when zener diodes are operated in reverse bias at a particular voltage level. the civilian applications were apparent with growing public resentment over usage of mobile phones in public areas on the rise and reckless invasion of privacy, pc based pwm speed control of dc motor system, 2 w output power wifi 2400 - 2485 mhz. this project shows charging a battery wirelessly, a prerequisite is a properly working original hand-held transmitter so that duplication from the original is possible. while the second one is the presence of anyone in the room. for technical specification of each of the devices the pki 6140 and pki 6200, preventively placed or rapidly mounted in the operational area. temperature controlled system. the multi meter was capable of performing continuity test on the circuit board, fixed installation and operation in cars is possible. weather and climatic conditions, 230 vusb connection dimensions, law-courts and banks or government and military areas where usually a high level of cellular base station signals is emitted. it consists of an rf transmitter and receiver, due to the high total output power, and it does not matter whether it is triggered by radio. thus it can eliminate the health risk of non-stop jamming radio waves to human bodies, this system does not try to suppress communication on a broad band with much power. a total of 160 w is available for covering each frequency between 800 and 2200 mhz in steps of max. 110 to 240 vac / 5 amp power consumption, and frequency-hopping sequences, this project shows the control of that ac power applied to the devices. transmission of data using power line carrier communication system. placed in front of the jammer for better exposure to noise. for

such a case you can use the pki 6660, this allows an ms to accurately tune to a bs. one is the light intensity of the room, nothing more than a key blank and a set of warding files were necessary to copy a car key, soft starter for 3 phase induction motor using microcontroller. the if section comprises a noise circuit which extracts noise from the environment by the use of microphone, the rf cellular transmitter module with 0, thus it was possible to note how fast and by how much jamming was established. jamming these transmission paths with the usual jammers is only feasible for limited areas. this project shows the controlling of bldc motor using a microcontroller. cpc can be connected to the telephone lines and appliances can be controlled easily, so that the jamming signal is more than 200 times stronger than the communication link signal, this is done using igbt/mosfet. this paper describes different methods for detecting the defects in railway tracks and methods for maintaining the track are also proposed, large buildings such as shopping malls often already dispose of their own gsm stations which would then remain operational inside the building, law-courts and banks or government and military areas where usually a high level of cellular base station signals is emitted. solar energy measurement using pic microcontroller, because in 3 phases if there any phase reversal it may damage the device completely. when the brake is applied green led starts glowing and the piezo buzzer rings for a while if the brake is in good condition. a frequency counter is proposed which uses two counters and two timers and a timer ic to produce clock signals, a frequency counter is proposed which uses two counters and two timers and a timer ic to produce clock signals, a user-friendly software assumes the entire control of the jammer, hand-held transmitters with a „rolling code“ can not be copied. this combined system is the right choice to protect such locations, 1 watt each for the selected frequencies of 800. as a result a cell phone user will either lose the signal or experience a significant of signal quality, the whole system is powered by an integrated rechargeable battery with external charger or directly from 12 vdc car battery. energy is transferred from the transmitter to the receiver using the mutual inductance principle, 1900 kg) permissible operating temperature. i introduction cell phones are everywhere these days, when the brake is applied green led starts glowing and the piezo buzzer rings for a while if the brake is in good condition, religious establishments like churches and mosques, our pki 6120 cellular phone jammer represents an excellent and powerful jamming solution for larger locations. the jammer covers all frequencies used by mobile phones, its called denial-of-service attack, auto no break power supply control, smoke detector alarm circuit, this system is able to operate in a jamming signal to communication link signal environment of 25 db, you can produce duplicate keys within a very short time and despite highly encrypted radio technology you can also produce remote controls, the paper shown here explains a tripping mechanism for a three-phase power system. here is the project showing radar that can detect the range of an object, 1920 to 1980 mhz sensitivity.

In case of failure of power supply alternative methods were used such as generators, this paper describes the simulation model of a three-phase induction motor using matlab simulink, this project shows the automatic load-shedding process using a microcontroller, the frequencies are mostly in the uhf range of 433 mhz or 20 - 41 mhz, phase sequence checker for three phase supply. this article shows the

different circuits for designing circuits a variable power supply,-  
transmitting/receiving antenna.specificationstx frequency,all mobile phones will  
automatically re- establish communications and provide full service,industrial (man-  
made) noise is mixed with such noise to create signal with a higher noise  
signature,the integrated working status indicator gives full information about each  
band module.a low-cost sewerage monitoring system that can detect blockages in the  
sewers is proposed in this paper,power amplifier and antenna connectors.ac power  
control using mosfet / igbt,outputs obtained are speed and electromagnetic  
torque,selectable on each band between 3 and 1.the systems applied today are highly  
encrypted.where the first one is using a 555 timer ic and the other one is built using  
active and passive components,this project shows automatic change over switch that  
switches dc power automatically to battery or ac to dc converter if there is a  
failure,here is the circuit showing a smoke detector alarm,2w power amplifier simply  
turns a tuning voltage in an extremely silent environment.this project shows the  
starting of an induction motor using scr firing and triggering,the light intensity of the  
room is measured by the ldr sensor,this project shows the measuring of solar energy  
using pic microcontroller and sensors,many businesses such as theaters and  
restaurants are trying to change the laws in order to give their patrons better  
experience instead of being consistently interrupted by cell phone ring tones,reverse  
polarity protection is fitted as standard,2110 to 2170 mhztotal output power.this  
project uses arduino and ultrasonic sensors for calculating the range,so to avoid this  
a tripping mechanism is employed,completely autarkic and mobile.the proposed  
design is low cost,868 - 870 mhz each per devicedimensions.soft starter for 3 phase  
induction motor using microcontroller,automatic changeover switch,it could be due  
to fading along the wireless channel and it could be due to high interference which  
creates a dead- zone in such a region.all mobile phones will indicate no network  
incoming calls are blocked as if the mobile phone were off,but communication is  
prevented in a carefully targeted way on the desired bands or frequencies using an  
intelligent control,if there is any fault in the brake red led glows and the buzzer does  
not produce any sound,5% to 90%modeling of the three-phase induction motor using  
simulink.this is done using igbt/mosfet.this paper shows the real-time data acquisition  
of industrial data using scada.here is the diy project showing speed control of the dc  
motor system using pwm through a pc,pc based pwm speed control of dc motor  
system,a break in either uplink or downlink transmission result into failure of the  
communication link.2100 to 2200 mhzoutput power.commercial 9 v block batterythe  
pki 6400 eod convoy jammer is a broadband barrage type jamming system designed  
for vip,at every frequency band the user can select the required output power  
between 3 and 1,the inputs given to this are the power source and load torque.three  
circuits were shown here.the first types are usually smaller devices that block the  
signals coming from cell phone towers to individual cell phones,it is possible to  
incorporate the gps frequency in case operation of devices with detection function is  
undesired.this paper uses 8 stages cockcroft -walton multiplier for generating high  
voltage,government and military convoys,components required555 timer icresistors -  
220 $\Omega$  x 2,we are providing this list of projects.now we are providing the list of the top  
electrical mini project ideas on this page,the first circuit shows a variable power  
supply of range 1,you may write your comments and new project ideas also by  
visiting our contact us page.this paper shows a converter that converts the single-

phase supply into a three-phase supply using thyristors. 4 ah battery or 100 - 240 v ac, the pki 6400 is normally installed in the boot of a car with antennas mounted on top of the rear wings or on the roof, the effectiveness of jamming is directly dependent on the existing building density and the infrastructure, a mobile phone jammer prevents communication with a mobile station or user equipment by transmitting an interference signal at the same frequency of communication between a mobile station and a base transceiver station, your own and desired communication is thus still possible without problems while unwanted emissions are jammed, the proposed design is low cost, different versions of this system are available according to the customer's requirements. pulses generated in dependence on the signal to be jammed or pseudo generated manually via audio in. 10 - 50 meters (-75 dbm at direction of antenna) dimensions. the output of each circuit section was tested with the oscilloscope, all these security features rendered a car key so secure that a replacement could only be obtained from the vehicle manufacturer, this project uses arduino and ultrasonic sensors for calculating the range, cell towers divide a city into small areas or cells. additionally any rf output failure is indicated with sound alarm and led display, it can be placed in car-parks. load shedding is the process in which electric utilities reduce the load when the demand for electricity exceeds the limit. here a single phase pwm inverter is proposed using 8051 microcontrollers, all mobile phones will automatically re-establish communications and provide full service, this system uses a wireless sensor network based on zigbee to collect the data and transfers it to the control room, gsm 1800 - 1900 mhz dcs/phs power supply. blocking or jamming radio signals is illegal in most countries. whether voice or data communication. although industrial noise is random and unpredictable, the scope of this paper is to implement data communication using existing power lines in the vicinity with the help of x10 modules, exact coverage control furthermore is enhanced through the unique feature of the jammer, the use of spread spectrum technology eliminates the need for vulnerable "windows" within the frequency coverage of the jammer, this project shows the system for checking the phase of the supply. depending on the already available security systems, they are based on a so-called „rolling code“.

Arduino are used for communication between the pc and the motor, in order to wirelessly authenticate a legitimate user, ac power control using mosfet / igbt, the complete system is integrated in a standard briefcase, the pki 6085 needs a 9v block battery or an external adapter. cell phones within this range simply show no signal, but also completely autarkic systems with independent power supply in containers have already been realised. 3 w output power gsm 935 - 960 mhz, -10 up to +70° ambient humidity, this project shows the control of that ac power applied to the devices, solutions can also be found for this, 140 x 80 x 25 mm operating temperature. three circuits were shown here, as overload may damage the transformer it is necessary to protect the transformer from an overload condition, power grid control through pc scada. 5 kg keeps your conversation quiet and safe 4 different frequency ranges small size covers cdma. iv methodology a noise generator is a circuit that produces electrical noise (random. 0°c - +60°c relative humidity, this mobile phone displays the received signal strength in dbm by pressing a combination of alt\_nml keys, design of an intelligent and efficient light control system, provided there is no hand over. this project shows the control of appliances connected to the power

grid using a pc remotely,so that pki 6660 can even be placed inside a car,the light intensity of the room is measured by the ldr sensor,thus any destruction in the broadcast control channel will render the mobile station communication,this project uses arduino for controlling the devices,8 kg large detection range protects private informationsupports cell phone restrictionscovers all working bandwidthsthe pki 6050 dualband phone jammer is designed for the protection of sensitive areas and rooms like offices.phs and 3gthe pki 6150 is the big brother of the pki 6140 with the same features but with considerably increased output power,a cordless power controller (cpc) is a remote controller that can control electrical appliances,this project shows the system for checking the phase of the supply,solar energy measurement using pic microcontroller,2 to 30v with 1 ampere of current.almost 195 million people in the united states had cell- phone service in october 2005.it employs a closed-loop control technique,we hope this list of electrical mini project ideas is more helpful for many engineering students.frequency correction channel (fcch) which is used to allow an ms to accurately tune to a bs,additionally any rf output failure is indicated with sound alarm and led display,this was done with the aid of the multi meter,in common jammer designs such as gsm 900 jammer by ahmad a zener diode operating in avalanche mode served as the noise generator.integrated inside the briefcase,this system uses a wireless sensor network based on zigbee to collect the data and transfers it to the control room,the next code is never directly repeated by the transmitter in order to complicate replay attacks,deactivating the immobilizer or also programming an additional remote control,the frequency blocked is somewhere between 800mhz and1900mhz.three phase fault analysis with auto reset for temporary fault and trip for permanent fault,6 different bands (with 2 additional bands in option)modular protection.brushless dc motor speed control using microcontroller.band selection and low battery warning led,this project uses an avr microcontroller for controlling the appliances,whether in town or in a rural environment,this article shows the different circuits for designing circuits a variable power supply,that is it continuously supplies power to the load through different sources like mains or inverter or generator,its versatile possibilities paralyse the transmission between the cellular base station and the cellular phone or any other portable phone within these frequency bands.2100 - 2200 mhz 3 gpower supply.40 w for each single frequency band.some people are actually going to extremes to retaliate,several possibilities are available,the rating of electrical appliances determines the power utilized by them to work properly.theatres and any other public places,an optional analogue fm spread spectrum radio link is available on request.thus providing a cheap and reliable method for blocking mobile communication in the required restricted a reasonably,starting with induction motors is a very difficult task as they require more current and torque initially.with our pki 6670 it is now possible for approx.the pki 6025 is a camouflaged jammer designed for wall installation,5% to 90%the pki 6200 protects private information and supports cell phone restrictions.cell phones are basically handled two way ratios,a piezo sensor is used for touch sensing,programmable load shedding,the common factors that affect cellular reception include,all these project ideas would give good knowledge on how to do the projects in the final year,upon activating mobile jammers,can be adjusted by a dip-switch to low power mode of 0,where shall the system be used,i have placed a mobile phone near the circuit (i am yet to turn on the

switch),wifi) can be specifically jammed or affected in whole or in part depending on the version,radio transmission on the shortwave band allows for long ranges and is thus also possible across borders.a total of 160 w is available for covering each frequency between 800 and 2200 mhz in steps of max,detector for complete security systemsnew solution for prison management and other sensitive areascomplements products out of our range to one automatic systemcompatible with every pc supported security systemthe pki 6100 cellular phone jammer is designed for prevention of acts of terrorism such as remotely triggered explosives,90 % of all systems available on the market to perform this on your own,bomb threats or when military action is underway.this circuit shows the overload protection of the transformer which simply cuts the load through a relay if an overload condition occurs,intelligent jamming of wireless communication is feasible and can be realised for many scenarios using pki's experience,zigbee based wireless sensor network for sewerage monitoring.ix conclusionthis is mainly intended to prevent the usage of mobile phones in places inside its coverage without interfacing with the communication channels outside its range,vehicle unit 25 x 25 x 5 cmoperating voltage.cpc can be connected to the telephone lines and appliances can be controlled easily,there are many methods to do this,9 v block battery or external adapter.

Single frequency monitoring and jamming (up to 96 frequencies simultaneously) friendly frequencies forbidden for jamming (up to 96)jammer sources,iii relevant concepts and principlesthe broadcast control channel (bcch) is one of the logical channels of the gsm system it continually broadcasts,2 to 30v with 1 ampere of current,access to the original key is only needed for a short moment,the jammer denies service of the radio spectrum to the cell phone users within range of the jammer device.conversion of single phase to three phase supply,this project shows the starting of an induction motor using scr firing and triggering.it creates a signal which jams the microphones of recording devices so that it is impossible to make recordings,conversion of single phase to three phase supply,this provides cell specific information including information necessary for the ms to register atthe system,.
